

DURA

Insulated Metal Panel

TrueCore's DuraPanel is designed for high-traffic zones and process areas where the interior facing demands added impact resistance. Reinforced with 3/8" oriented strand board (OSB) sandwiched between the interior metal face and the foamed-in-place polyisocyanurate core, our DuraPanel significantly reduces potential for severe damage.

When you need extra durability, choose TrueCore's DuraPanel.

SIDE JOINT

PANEL PROFILE AND CROSS SECTION

EXTERIOR AND INTERIOR PROFILE & TEXTURE

Mesa profile with non-directional stucco embossing

EXTERIOR FACINGS

26 Ga. G-90 galvanized or AZ50 aluminum coated steel

INTERIOR FACINGS

26 Ga. G-90 galvanized or AZ50 aluminum coated steel

EXTERIOR COATINGS

Siliconized Polyester (SMP)
Fluoropolymer (PVDF)
Flurothane* II, IV, V

INTERIOR COATINGS

Polyester
Siliconized Polyester (SMP)
Fluoropolymer (PVDF)
Flurothane* II, IV, V
PVC Plastisol

WIDTH

44", 40"

LENGTH

8'-0" to 30'-0" standard
Contact TrueCore for information and pricing on longer lengths.

THICKNESS

4"

CORE

Foamed-in-place Class 1 rated polyisocyanurate

JOINT

Double Tongue and Groove for concealed fastening

R-VALUE

R-8 per inch of thickness (nominal)
